Dear Sir /
Madam,

Recently I learned about your summer software Intern position from Strategy Consulting Analyst . I have always wanted to be a part of a company that provides me with opportunities to learn industry-related skills and technologies. I am confident that my enthusiasm, self- motivation and relevant experience would make me a great fit for your program.

I have a passion for all things electronic, and I am pursuing this passion while working towards a degree in computer science at Boston University as a senior student. My graduation date is December 2019.

Over the past semester, I have successfully finished several courses, including advanced algorithms, databases and privacy in machine learning, and completed corresponding assignments and projects. Currently, I am taking artificial intelligence, database in SQL and software development to further hone my skills and broaden my tech stack. Through these courses, I have gained experience adapting to different technologies and programming languages for each project, including Java, Python. Combined with my proficiency in C++, algorithms and data structure, it has made me an adaptable learner, and a big advocate for trying new and unfamiliar things.

Furthermore, I have a previous work experience as a software developer intern at BCTC.io. Through this experience, I have learned about what a real productive environment looks like, as well as managing my workload and communicating effectively with co-workers both remotely and locally.

My enthusiasm for interesting work is boundless, and I strive to always bring my positive energy to every work environment. I would add value to the organization by bringing my teamwork, communication, presentation skills, as well as the technical abilities I have developed over the past 4 years. I would love the opportunity to further discuss my interest in the position, please feel free to contact me at yesyong@bu.edu and 1(718) 813-4377.

Thank you for your time and
consideration.

Best
regards,

Yong (Caleb)
Zhou
